PROFILE SUMMARY

Aspiring AI/ML Engineer with hands-on experience in machine learning model development, data preprocessing, and feature engineering. Skilled in Python, scikit-learn, Pandas, NumPy, and building classification and regression models. Experienced in applying EDA, model evaluation, and hyperparameter tuning to real-world datasets. Strong foundation in data structures, algorithms, and statistical analysis.

EDUCATION

GIFT Autonomous, Bhubaneswar (GIFT) — Bhubaneswar, Odisha
Bachelor Of Technology (CGPA 8.7) — *Continuing*

Rural Institute of Higher Studies (RIHS) — Bhograi, Odisha
Higher Secondary Education (Science) (Secured 77.66%) — *2023*

Prasad Chandra Govt. High School — Kachuadi, Odisha
Secondary Education (Secured 86%) — *2021*

INTERNSHIPS

AI/ML Intern - Central Tool Room & Training Centre (CTTC) — Jun 2025

- Involved in data preprocessing and analysis to prepare data for machine learning models.
- Built and evaluated classification models using scikit-learn, applying feature scaling, train-test split, and cross-validation techniques.
- Applied feature engineering techniques to enhance model performance and accuracy.
- Evaluated model performance using accuracy, precision, recall, and confusion matrix, improving prediction reliability.
- Contributed to discussions with mentors to learn about practical applications of AI in the industrial sector.

AI/ML Researcher Intern - Owl AI — Sep 2025

- Supported research and experimentation with machine learning models for data-driven insights.
- Performed EDA using Pandas, NumPy, and Matplotlib, identifying data patterns and improving model input quality.
- Conducted hyperparameter tuning and model optimization to improve prediction accuracy.
- Applied research findings to discussions and solution development.
- Investigated practical AI applications and new advancements in machine learning.

PROJECTS

AI Career Portal — Intelligent Career Guidance System

- Created an AI-based system for suggesting career options based on user skills, interests.
- Built a career recommendation system using classification algorithms, feature engineering.
- Performed data cleaning, feature selection, and normalization to enhance model performance.
- Created a user-friendly interface for entering user profiles and visualizing career suggestions.
- Improved decision-making for students with data-driven information.

Technologies: Python, Machine Learning, Data Preprocessing, Web Technologies

Krushi Sathi — Smart Agriculture Assistance System

- Developed an AI-based agriculture assistance system to provide farmers with crop-related information.
- Developed predictive models using agricultural and environmental data for **yield prediction .**
- Implemented data acquisition, preprocessing, and training for agricultural datasets.
- Offered intelligent suggestions for crop management based on data patterns.
- Targeted the application of AI-based solutions for agricultural problems.

Technologies: Python, Machine Learning, Data Analysis, Predictive Modeling

TECHNICAL SKILLS

- **Languages:** Python, Java
- **Machine Learning:** Supervised Learning, Classification, Regression, Model Evaluation
- **Libraries & Frameworks:** NumPy, Pandas, scikit-learn
- **Data Analysis & Visualization:** Matplotlib, Seaborn, Exploratory Data Analysis (EDA)
- **Tools & Platforms:** Jupyter Notebook, Google Colab, VS Code, Git, GitHub
- **Databases:** MySQL, MongoDB
- **Core Concepts:** Data Preprocessing, Feature Engineering, Statistical Analysis, Problem Solving

CERTIFICATION

- **Certified in Database Foundations** | *Oracle Academy* Jan. 2025
- **Completed Web Development Workshop** | *3Skill* Sept. 2025
- **NPTEL Certified – Introduction to Industry 4.0 and IoT** | *NPTEL* May. 2025

EXTRACURRICULAR ACTIVITIES/ ACHIEVEMENTS

- Finalist — Biju Patnaik University of Technology Project Exhibition
- Best Intern of the Month — 3Skill

SOFT SKILLS

- Analyzed and solved problems efficiently and accurately.
- Delivered high-quality work with consistency and attention to detail.
- Communicated effectively and collaborated well with team members.
- Adapted quickly to new technologies and dynamic work environments.
- Managed time effectively to meet deadlines and project goals.
